# Opus Clean

~ Vinyl Cleaner made from Ionized Water

Minus ion water type cleaner, that is harmless / odorless / not contain synthetic surface acting agent, sodium hydroxide, petroleum-based solvent, fluorescent bleaching agent, and ozone. By finely micronizing water molecule through electrolytic alkali ion exchange, the function of water is enhanced to have more powerful detergency.

- Original Sound** By removing the dirt and static electricity on the disk, it will revive the original sound quality.
- Earth Friendly** because Opus Clean is not synthetic detergent.
- Human Friendly** because it does not contain sodium hydroxide and any stimulatory substance.
- Object Friendly** because it makes no chemical reaction in the material. cleaner be able to wipe by floating the dirt is the Opus Clean.
- Contamination Preventable** because it penetrate inside the smudge and simultaneously resolves static generation, It prevents the adhesion of dirt again.

## How to use

Drip few drop of cleaner over the vinyl disc.

Expand the liquid with the cleaning cloth.

Firmly wipe off with another soft cloth.

\* Please do not use the liquid for a center label. / Please do not be air-dried. It remains dirt has been left.

- Non-potable. (Please drink water when you swallowed it by mistake.)
- Please store it avoiding direct sunlight. ■ It may discolor the material to be cleaned, do not use the liquid for a center label.
- Please keep it out of reach of infants. ■ When you opened a toggle cap, drop of the liquid may splash.
